

AAPT VOICE ISDN

AAPT ISDN directly connects you to our carrier-grade national voice, data and internet network. You can access highly competitive rates, keep your existing phone number and retain your existing equipment.

1 CONNECT DIRECTLY TO OUR NATIONAL NETWORK.

As a directly connected customer we are able to work with you to improve your business performance and offer genuine value and better service.

Call anywhere

AAPT ISDN is a premium quality service that enables you to make local, national, mobile, international and special service calls through multiple phone lines. Calls within Australia are made through our carrier grade voice and data network; overseas calls are made via our partnerships with leading overseas networks.

High call traffic

You can choose ISDN 10, 20 or 30 channel primary rate access. AAPT ISDN is especially useful for high call traffic applications such as those generated by PBXs. Call centres and companies with high call volumes can choose multiple 30 channel connections with flexible pricing packages and advanced support to suit their needs.

Enjoy global coverage and reliable service with AAPT ISDN.

2 MAKE IT EASIER TO CALL AND BE CALLED WITH MULTIPLE PHONE LINES.

Direct extension numbers make it easier for customers to reach individual staff members. AAPT ISDN also offers a range of other features designed to enhance your business productivity.

1. Number portability

Keep your existing numbers or choose from a new number range.

2. Flexible access configurations

We can configure AAPT ISDN to support either 'both way' or 'outgoing call traffic' only. If you choose 'outgoing call traffic' you can still benefit from better pricing on these calls.

3. Redirect calls

Redirect incoming calls from a single or range of numbers to an alternative number during a scheduled business event or emergency.

4. Separate data calls

AAPT enables you to use your ISDN connection for data applications via incoming and outgoing switched data calls at 64Kbps.

3 ENJOY COST SAVINGS AND VALUABLE MANAGEMENT SUPPORT.

Your direct connection to the AAPT network enables us to offer you cost savings and service enhancements.

Save with AAPT ISDN

- Access a range of highly competitive voice call rates and pricing plans.
- Save on installation and reduce your access rental costs.
- Be part of special volume discounts, credits and other loyalty rewards.

Simplify management

- Make life easier with one provider, one bill and one point of contact.
- Receive 24/7 support to minimise hassles and improve business continuity.
- Access AAPT Online Bill Analyser to analyse costs, reconcile accounts and identify savings.

As you can see, AAPT ISDN provides you with a wide range of calling, cost and service benefits.

Contact AAPT for more information on how ISDN can help your business.
